## WHO WE ARE:

- Since **1985**, **D+R International Ltd** has supported programs and marketing initiatives with technical and market development activities that advance energy-efficient solutions, technologies, best practices, and new energy standards to build strong environmental initiatives and market-focused solutions that deliver results.
- We have technical expertise in building energy, HVAC, water heating, electrification, and electric vehicles, including phase change materials, refrigeration systems, and ADR-enabled connected devices.
- D+R delivers a comprehensive analytical framework, tools, and decision-making criteria to assist clients in leveraging their technological expenditures.
- Our technical instructors collaborate with industry experts to develop a compelling technological content catalog of courses. We have 40 online courses with the most challenging training objectives.
- We operate onsite or virtual and facilitate training with various forms of radical market solutions for a new energy future.
- We encourage continuous professional growth even after the successful implementation of recommended initiatives.
